PHY2MN Time :2 Hours All Questions can be that is electric flux, and extric field is nonuniform that is the expression for exight-hand rule to find that is cyclotron frequent	PHYSICS N101 - Electromagnetism and Net 2024 Admission onward Section A e answered. Each Question carrie ab's law in electrostatics. how can we determine the electric m? If the force experiencing on a move the direction for force. acy and write down the expression	Maximum Marks :70 es 3 marks (Ceiling: 24 Marks) c flux through a given area when the ing charge in a magnetic field and explain	
PHY2MN Time :2 Hours All Questions can be that is electric flux, and extric field is nonuniform that is the expression for exight-hand rule to find that is cyclotron frequent	PHYSICS N101 - Electromagnetism and Net 2024 Admission onward Section A e answered. Each Question carrie ab's law in electrostatics. how can we determine the electric m? If the force experiencing on a move the direction for force. acy and write down the expression	EXAMINATION, APRIL 2025 twork Theorems Is Maximum Marks :70 es 3 marks (Ceiling: 24 Marks) c flux through a given area when the ing charge in a magnetic field and explain	
PHY2MN Time :2 Hours All Questions can be that is electric flux, and extric field is nonuniform that is the expression for exight-hand rule to find that is cyclotron frequent	PHYSICS N101 - Electromagnetism and Net 2024 Admission onward Section A e answered. Each Question carrie ab's law in electrostatics. how can we determine the electric m? If the force experiencing on a move the direction for force. acy and write down the expression	Maximum Marks :70 es 3 marks (Ceiling: 24 Marks) c flux through a given area when the ing charge in a magnetic field and explain	
All Questions can be atte and explain Coulom that is electric flux, and extric field is nonuniform that is the expression for exight-hand rule to find that is cyclotron frequen	Section A e answered. Each Question carrie ab's law in electrostatics. how can we determine the electric m? r the force experiencing on a move the direction for force. acy and write down the expression	Maximum Marks :70 es 3 marks (Ceiling: 24 Marks) c flux through a given area when the ing charge in a magnetic field and explain	
All Questions can be atte and explain Coulom that is electric flux, and extric field is nonuniform that is the expression for exight-hand rule to find that is cyclotron frequen	Section A e answered. Each Question carrie ab's law in electrostatics. how can we determine the electric m? or the force experiencing on a move the direction for force. acy and write down the expression	Maximum Marks :70 es 3 marks (Ceiling: 24 Marks) c flux through a given area when the ing charge in a magnetic field and explain	
All Questions can be that is electric flux, and extric field is nonuniform that is the expression for exight-hand rule to find that is cyclotron frequen	Section A e answered. Each Question carrie ab's law in electrostatics. how can we determine the electric m? If the force experiencing on a move the direction for force. The procession of the expression of the	Maximum Marks :70 es 3 marks (Ceiling: 24 Marks) c flux through a given area when the ing charge in a magnetic field and explain	
All Questions can be that is electric flux, and extric field is nonuniform that is the expression for exight-hand rule to find that is cyclotron frequen	e answered. Each Question carried the state of the state	es 3 marks (Ceiling: 24 Marks) c flux through a given area when the ing charge in a magnetic field and explain	
hat is electric flux, and extric field is nonuniformat is the expression for eright-hand rule to find that is cyclotron frequen	e answered. Each Question carried the state of the state	c flux through a given area when the ing charge in a magnetic field and explain	
hat is electric flux, and extric field is nonuniformat is the expression for eright-hand rule to find that is cyclotron frequen	how can we determine the electric m? The force experiencing on a moved the direction for force. The direction for force and write down the expression and write down the expression are the direction for force.	c flux through a given area when the ing charge in a magnetic field and explain	
hat is electric flux, and extric field is nonuniform hat is the expression for eright-hand rule to find hat is cyclotron frequen	how can we determine the electric m? If the force experiencing on a move of the direction for force. The many and write down the expression of the electric many and the electric many and the electric many are expression of the electric many are electric many are expression of the electric many are expression of the electric many are	ing charge in a magnetic field and explain	
cetric field is nonuniform that is the expression for e right-hand rule to find that is cyclotron frequen	r the force experiencing on a moved the direction for force. acy and write down the expression	ing charge in a magnetic field and explain	
e right-hand rule to find hat is cyclotron frequen	If the direction for force. The property and write down the expression		
		n for it.	
fine the magnetic dipol		What is cyclotron frequency and write down the expression for it.	
	Define the magnetic dipole moment of a current-carrying loop and write its expression.		
State and explain Kirchhoff's second law.			
How do you determine the equivalent current source when converting a voltage source with a series resistance?			
fine ideal voltage source	ce and ideal current source		
State Norton's theorem.			
hat is Q factor in an AC	C circuit?		
	Section B		
All Questions can be	e answered. Each Question carrie	es 6 marks (Ceiling: 36 Marks)	
A dipole consists of two charges, +3.0 μC and -3.0 μC, separated by a distance of 6.0 cm. The dipole is placed in a uniform electric field of magnitude 2.0×10 ⁵ N/C. Initially, the dipole is oriented at an angle of 30° with respect to the electric field. (a)Calculate the magnitude of the torque acting on the dipole. (b) Determine the potential energy of the dipole in this orientation.			
Derive the expression for electric field due to an infinite plane sheet of charge in terms of its charge density.			
A magnetron in a microwave oven emits electromagnetic waves with frequency $f = 2450$ MHz. What magnetic field strength is required for electrons to move in circular paths with this frequency?			
	All Questions can be blaced in a uniform elegate of 30° with respect Calculate the magnitude Determine the potential rive the expression for asity.	fine ideal voltage source and ideal current source te Norton's theorem. nat is Q factor in an AC circuit? Section B All Questions can be answered. Each Question carrie lipole consists of two charges, +3.0 μC and -3.0 μC, sepulaced in a uniform electric field of magnitude 2.0×10 ⁵ No gle of 30° with respect to the electric field. Calculate the magnitude of the torque acting on the dipole Determine the potential energy of the dipole in this ories rive the expression for electric field due to an infinite plansity. magnetron in a microwave oven emits electromagnetic was a magnetic magnetic was a magnetic magnetic was a magnetron in a microwave oven emits electromagnetic was a magnetic magnetic was a magnetic magnetic was a magnetic magnetic was a magnetic was a magnetic magnetic was a	

15	Two batteries A and B are connected in parallel and load of 10Ω is connected across their terminals. A has an e.m.f. of 12 V and an internal resistance of 2Ω ; B has an e.m.f. of 8 V and an internal resistance of 1Ω . Use Kirchhoff's laws to determine the values and directions of the currents flowing in each of the batteries and in the external resistance. Also determine the potential difference across the external resistance.	
16	Apply Thevenin's theorem to calculate the current through the 4 Ω resistor in the given circuit.	
17	State and prove maximum power transfer theorem.	
18	In a series circuit containing pure resistance and a pure inductance, the current and the voltage are expressed as: $i(t) = 5\sin(314t + 2\pi/3)$ and $v(t) = 15\sin(314t + 5\pi/6)$ (a) What is the impedance of the circuit? (b) What is the value of the resistance? (c) What is the inductance in henrys? (d) What is the average power drawn by the circuit?	
Section C		
Answer any ONE. Each Question carries 10 marks (1x10=10 Marks)		
19	Discuss the characteristics of a series RLC circuit when an AC voltage is applied. How does resonance occur, and what are its effects?	
20	State Ampere's law and derive the expression for the magnetic field produced by a solenoid and a toroid.
